# STE Assessment – Bug Challenge

## API bugs:

**ID:** 1

**Title:** No validation for username field, POST /api/employees

**Environment:** Prod

**Preconditions:**

-

**Steps to Reproduce:**
1. Send request via curl below with no information about username

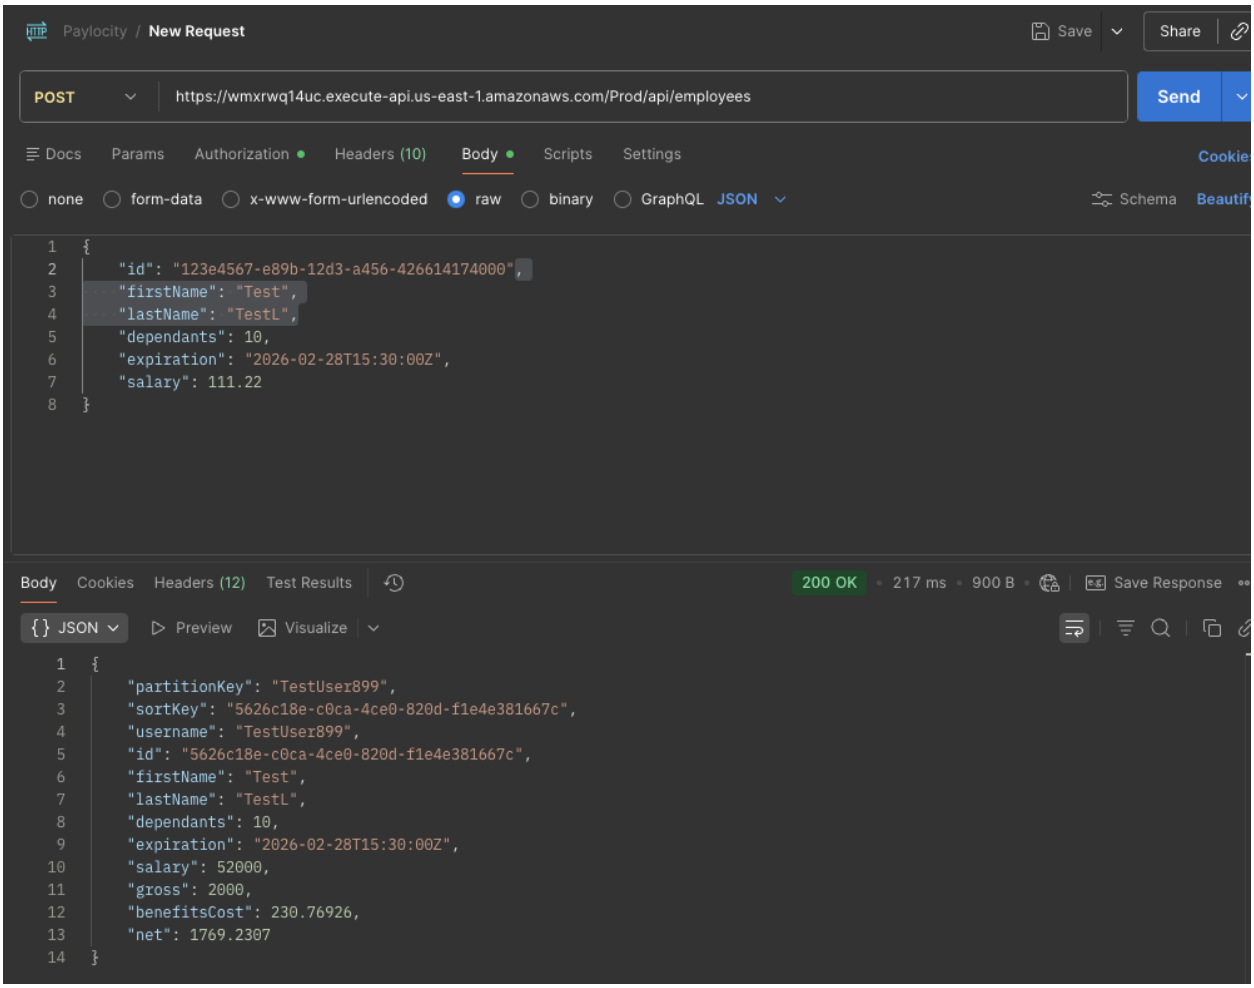
```
curl --location 'https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/api/employees' \
--header 'Content-Type: application/json' \
--header 'Authorization: Basic VGVzdFVzZXI4OTk6I3paWDtRfGlxRjh6' \
--data '{
    "id": "123e4567-e89b-12d3-a456-426614174000",
    "firstName": "Test",
    "lastName": "TestL",
    "dependants": 10,
    "expiration": "2026-02-28T15:30:00Z",
    "salary": 111.22
}'
```

**Expected Result:**

Error should appear in the response

**Actual Result:**
No validation exists for username, response code is 200

**Screenshot**:



**ID:** 2

**Title:** Invalid data type for username, POST /api/employees

**Environment:** Prod

**Preconditions:**

-

**Steps to Reproduce:**

1. Send request via curl below with invalid value type for username:

curl --location 'https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/api/employees' \

--header 'Content-Type: application/json' \

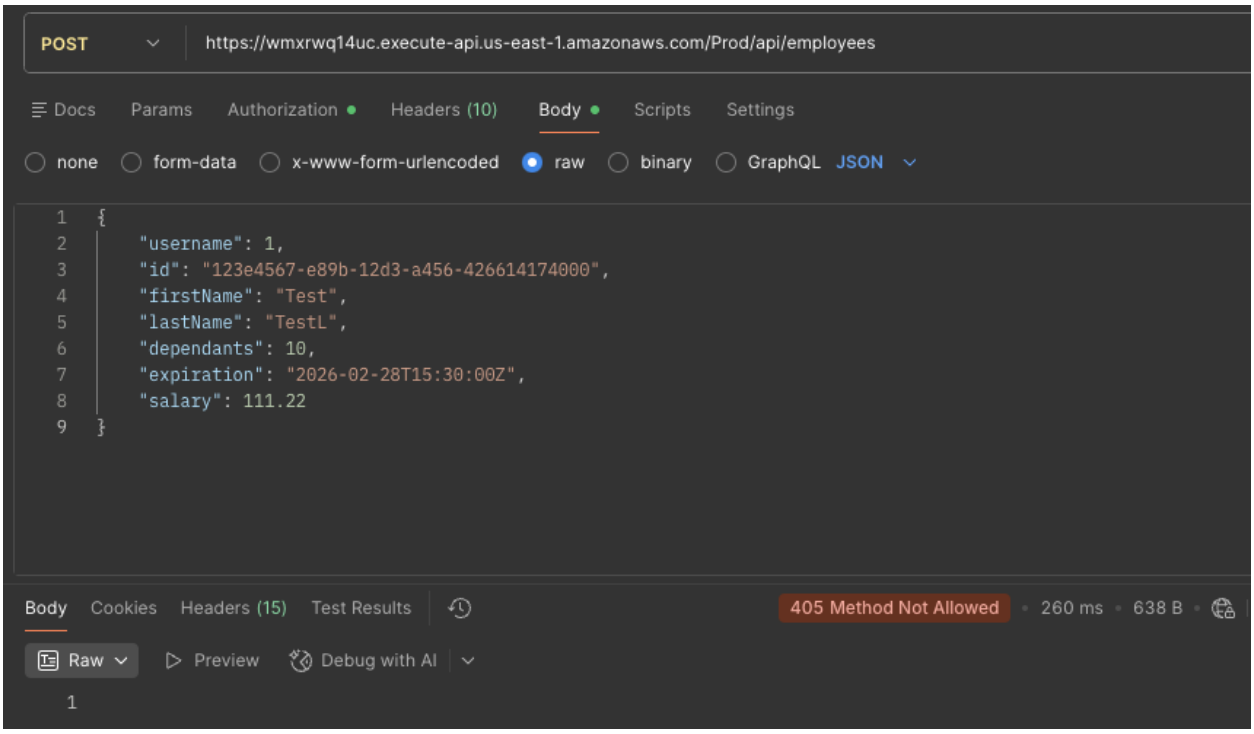
```
--header 'Authorization: Basic VGVzdFVzZXI4OTk6I3paWDtRfGlxRjh6' \
--data '{
    "username": 1,
    "id": "123e4567-e89b-12d3-a456-426614174000",
    "firstName": "Test",
    "lastName": "TestL",
    "dependants": 10,
    "expiration": "2026-02-28T15:30:00Z",
    "salary": 111.22
}'
```

**Expected Result:**

Error should appear in the response, response code is 400

**Actual Result:**
Response code is 405

**Screenshot**:



**ID:** 3

**Title:** Non-existed id, PUT /api/employees

**Environment:** Prod

**Preconditions:**

-

**Steps to Reproduce:**
1. Send request via curl below with non-existed employee and his id:

curl --location --request PUT 'https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/api/employees' \

--header 'Content-Type: application/json' \

--header 'Authorization: Basic VGVzdFVzZXI4OTk6I3paWDtRfGlxRjh6' \

--data '{

"username": "usernameT",

"id": "095264d1-7a33-4276-8182-da094f5fb5f0",

"firstName": "Testxx",

"lastName": "TestLasxx",

"dependants": 10,

"expiration": "2026-02-28T17:45:00+05:30",

"salary": "100"

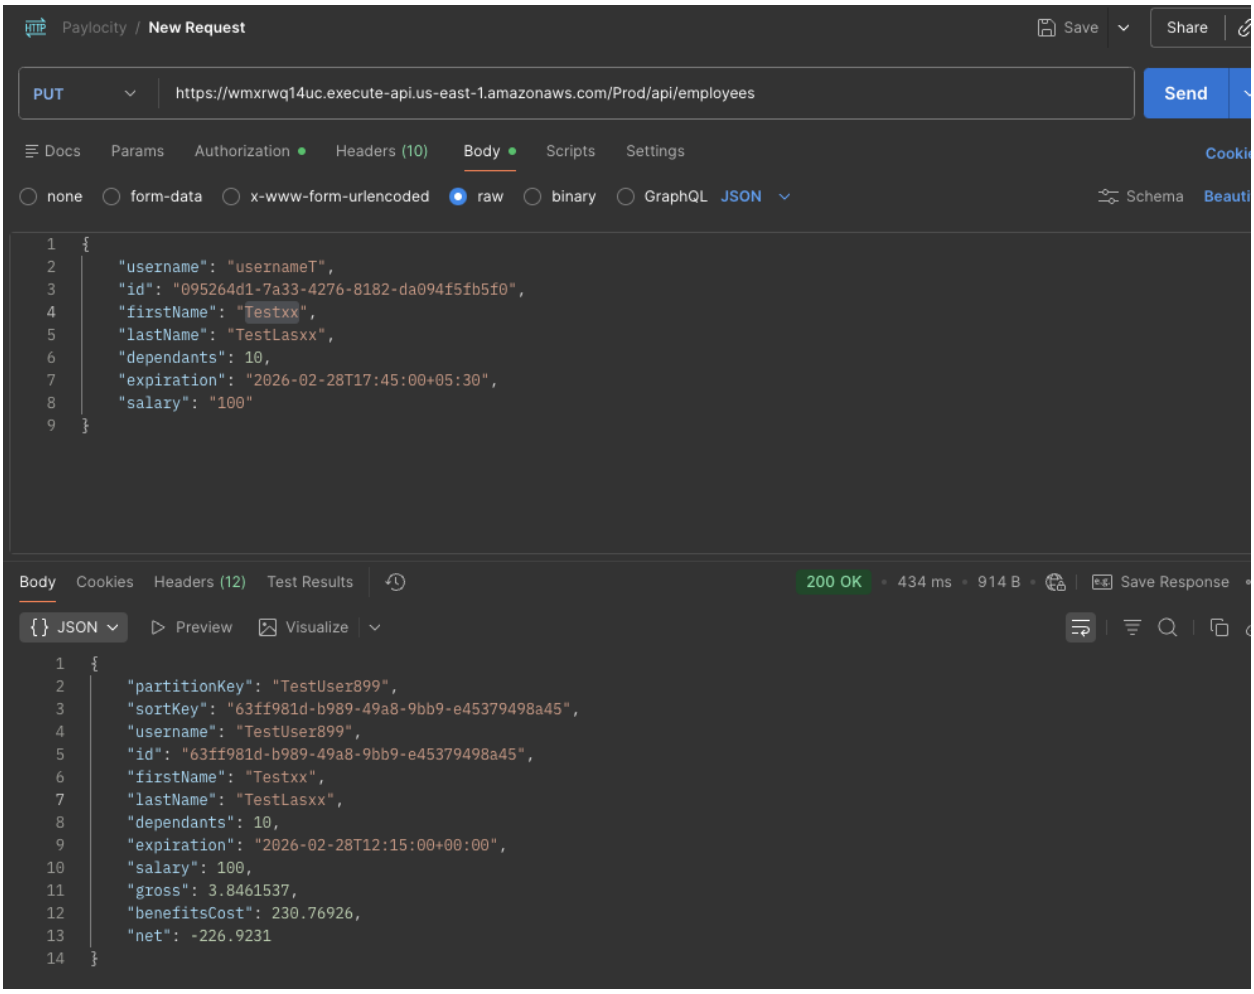
}'

**Expected Result:**

Error should appear in the response, no employee with this name and id exists

**Actual Result:**
New employee is created, response code is 200

**Screenshot**:



**ID:** 4

**Title:** No validation for username field, PUT /api/employees

**Environment:** Prod

**Preconditions:**

-

**Steps to Reproduce:**

1. Send PUT request without username

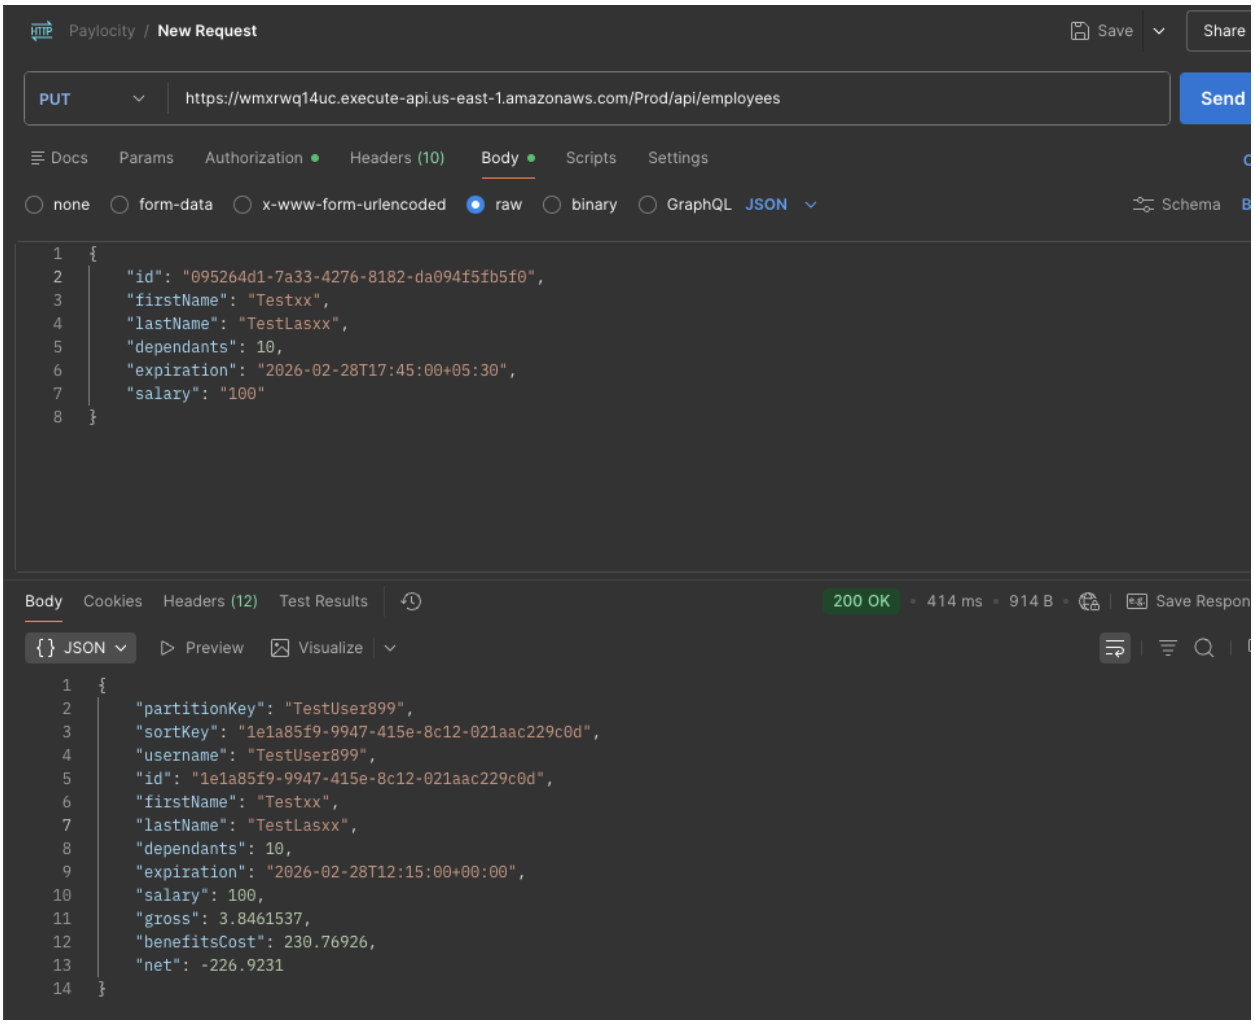
**Expected Result:**

Error should appear in the response

**Actual Result:**

No validation exists for username, username is TestUser899, response code is 200

**Screenshot**:



**ID:** 5

**Title:** Response for non-existed employee id, DELETE /api/employees

**Environment:** Prod

**Preconditions:**

-

**Steps to Reproduce:**

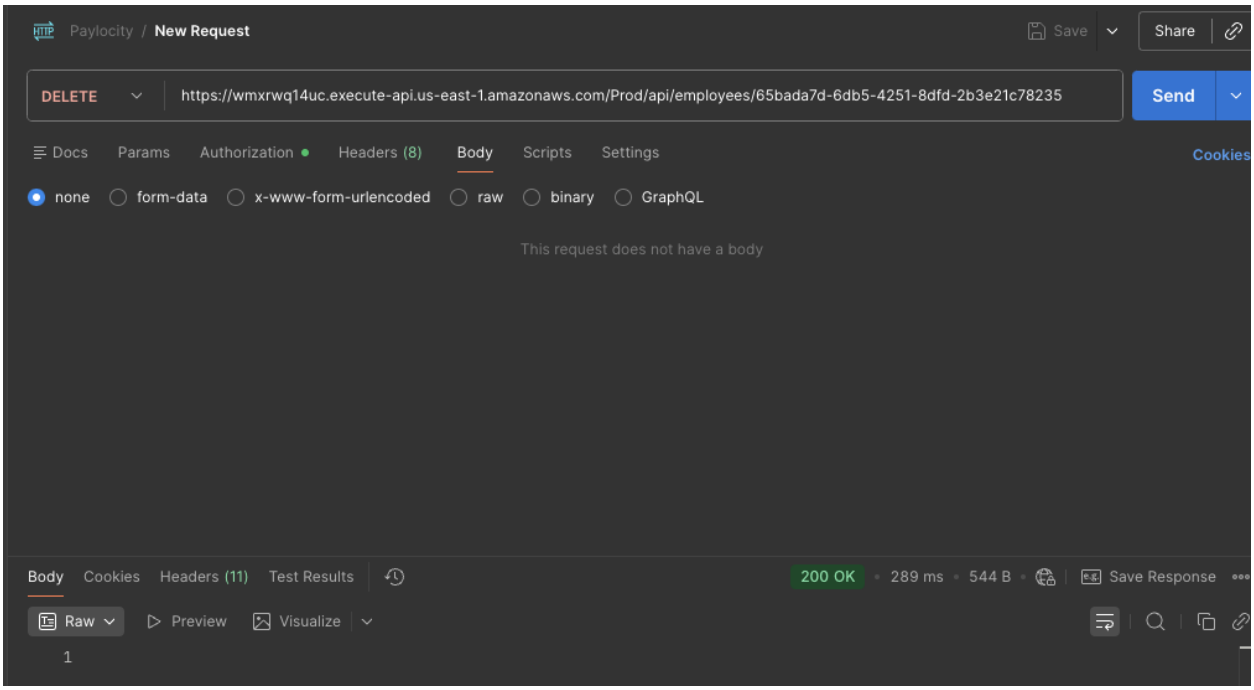
1. Send DELETE request with non-existed id

**Expected Result:**

Error should appear in the response

**Actual Result:**
No validation exists for id, response code is 200

**Screenshot**:



**ID:** 6

**Title:** Invalid type for employee id, DELETE /api/employees

**Environment:** Prod

**Preconditions:**

-

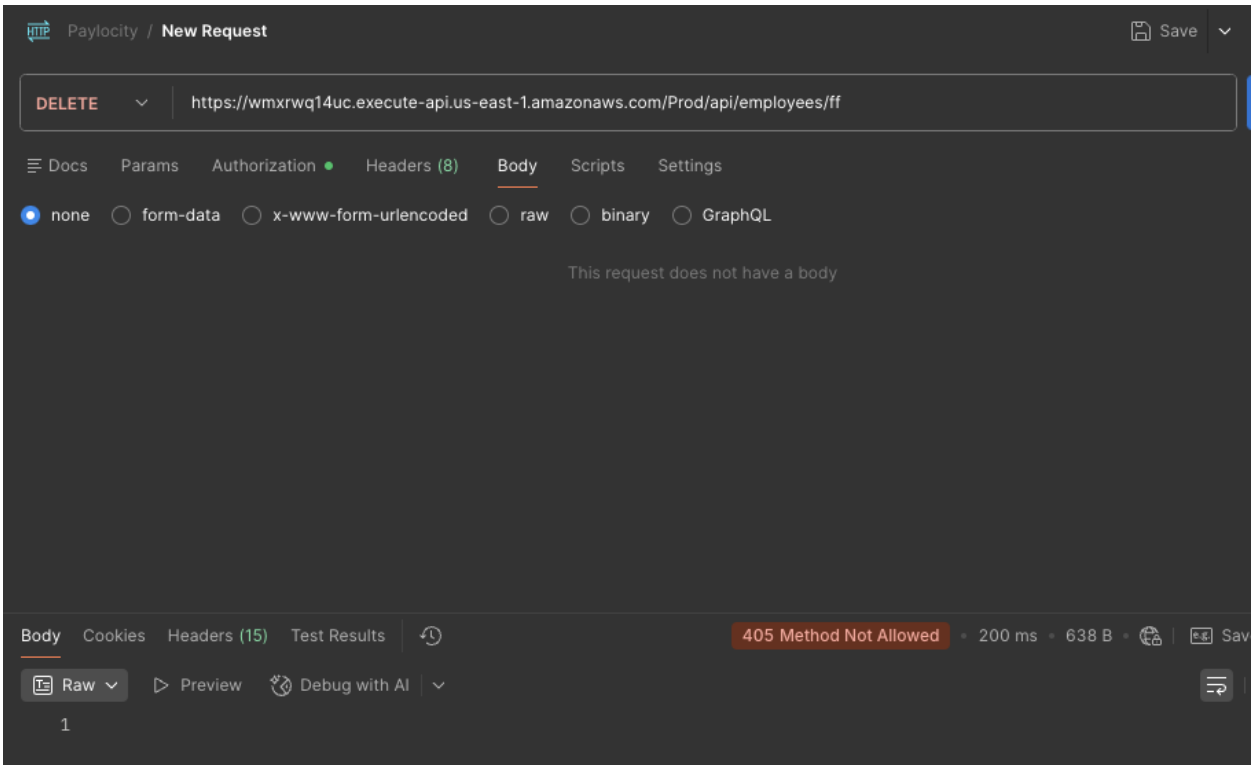
**Steps to Reproduce:**
1. Send DELETE request with invalid data type id

**Expected Result:**

Error should appear in the response, response code is 400

**Actual Result:**
Response code is 405

**Screenshot**:



**ID:** 7

**Title:** Incorrect response for not found employee, GET /api/Employees/{id}

**Environment:** Prod

**Preconditions:**

-

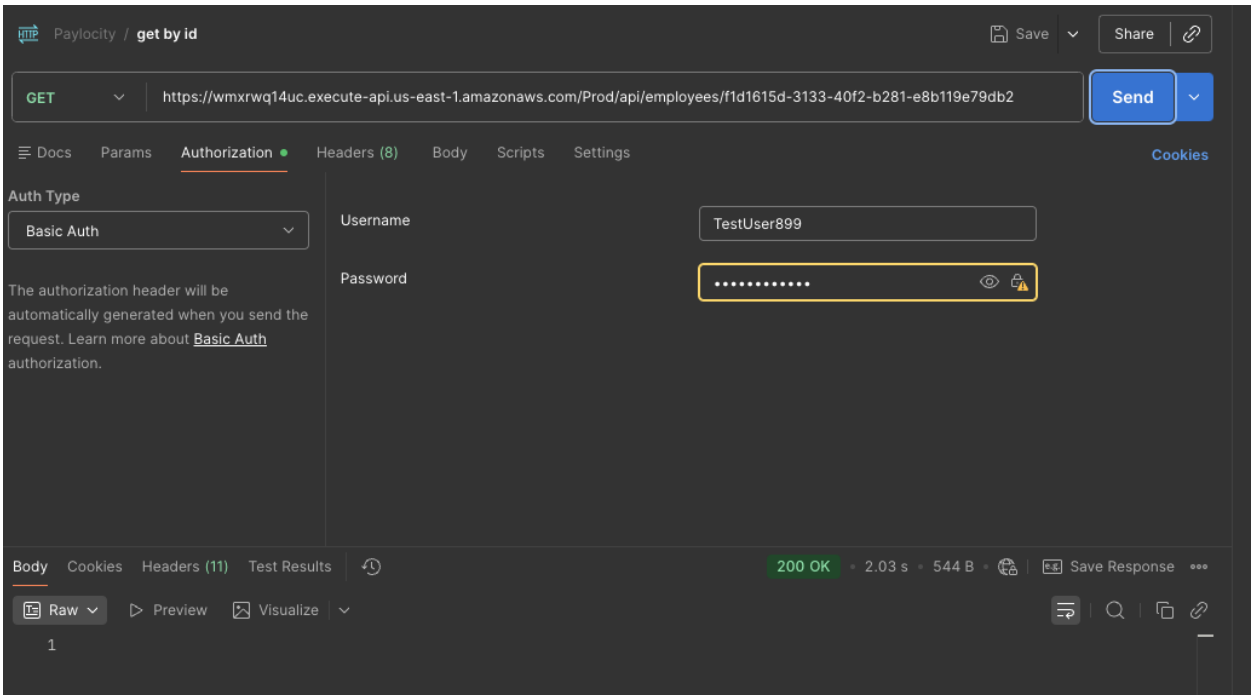
**Steps to Reproduce:**
1. Send GET request with id, which does not exist

**Expected Result:**

Response code is 404

**Actual Result:**
Response code is 200

**Screenshot**:



**ID:** 8

**Title:** Negative Net Pay value, PUT /api/Employees/{id}

**Environment:** Prod

**Preconditions:**

Log in to the 'Paylocity Benefits Dashboard'

**Steps to Reproduce:**

1. Send PUT request with id, which does not exist. Example of curl:

curl --location --request PUT 'https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/api/employees' \

--header 'Content-Type: application/json' \

--header 'Authorization: Basic VGVzdFVzZXI4OTk6I3paWDtRfGlxRjh6' \

--data '{

"username": "usernameT",

"id": "095264d1-7a33-4276-8182-da094f5fb5f3",

"firstName": "Test10",

"lastName": "TestLas20",

"dependants": 10,

"expiration": "2026-02-28T17:45:00+05:30",

"salary": 100.1

}'

2. Open https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/Benefits page

**Expected Result:**

Negative value Net Pay is not present on the page

**Actual Result:**
Net Pay has a negative value

**Screenshot**:

| | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| b4e1babb-bc57-43b2-9dcd-cc7003e145d2 | Test10 | TestLas20 | 10 | 100.10 | 3.85 | 230.77 | -226.92 | |

**ID:** 9

**Title:** Internal server error, GET /api/Employees/{id}

**Environment:** Prod

**Preconditions:**

-

**Steps to Reproduce:**
1. Send GET request via curl:
curl --location 'https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/api/employees/00000000-0000-0000-0000-000000000000' \

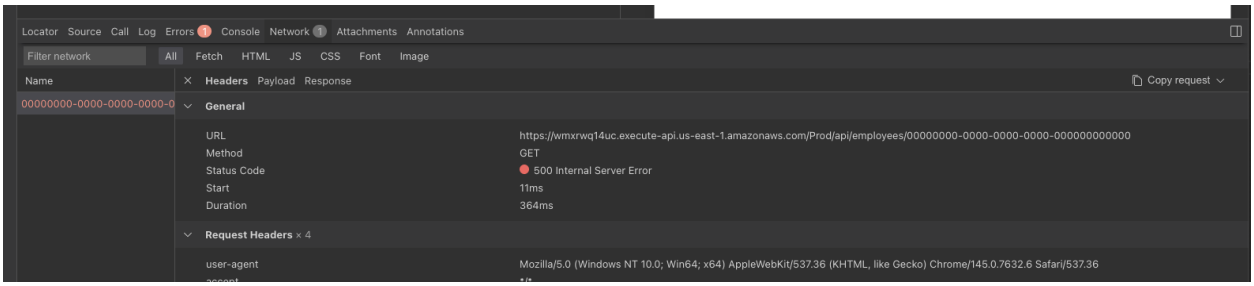
--header 'Authorization: Basic VGVzdFVzZXI4OTk6I3paWDtRfGlxRjh6'

**Expected Result:**

Not found response is returned, status code is 404

**Actual Result:**
500 Internal Server Error is returned

**Screenshot**:



**ID:** 10

**Title:** Incorrect format uuid, GET /api/Employees/{id}

**Environment:** Prod

**Preconditions:**

-

**Steps to Reproduce:**
1. Send GET request via curl, where the id has incorrect format:

curl --location 'https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/api/employees/fdd' \

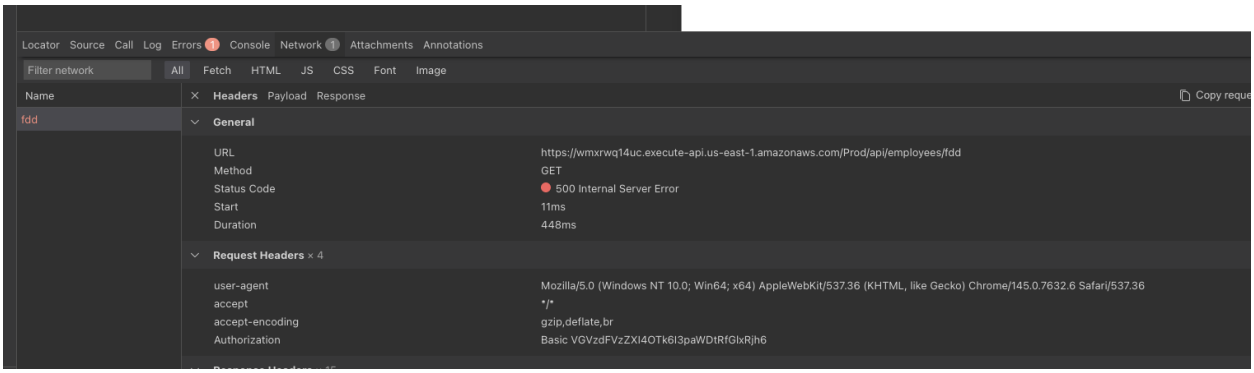
--header 'Authorization: Basic VGVzdFVzZXI4OTk6I3paWDtRfGlxRjh6'

**Expected Result:**

Response code is 400

**Actual Result:**
500 Internal Server Error is returned

**Screenshot**:



**ID:** 11

**Title:** Incorrect response code for invalide data type, PUT /api/Employees/{id}

**Environment:** Prod

**Preconditions:**

-

**Steps to Reproduce:**

1. Send GET request via curl, where the id has incorrect format:

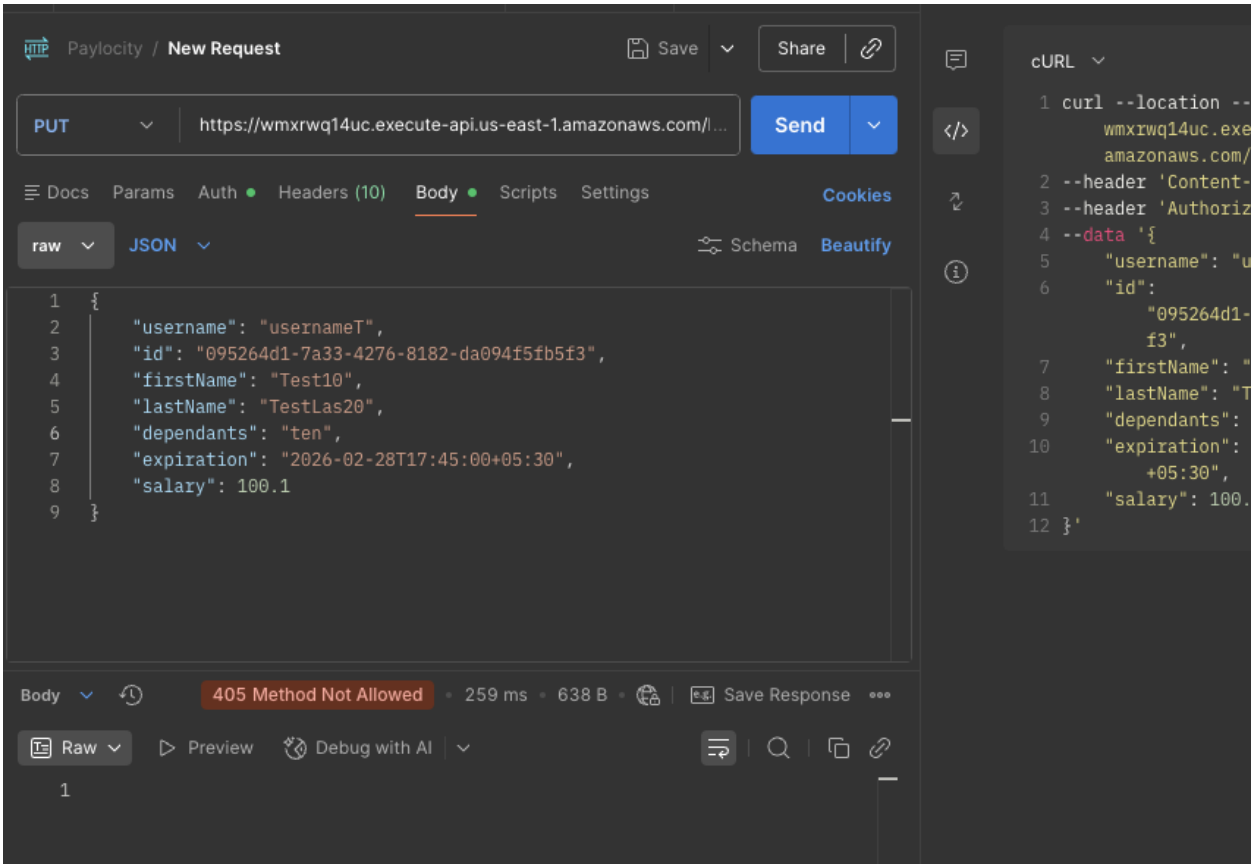
```
curl --location --request PUT 'https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/api/employees' \
--header 'Content-Type: application/json' \
--header 'Authorization: Basic VGVzdFVzZXI4OTk6I3paWDtRfGlxRjh6' \
--data '{
    "username": "usernameT",
    "id": "095264d1-7a33-4276-8182-da094f5fb5f3",
    "firstName": "Test10",
    "lastName": "TestLas20",
    "dependants": "ten",
    "expiration": "2026-02-28T17:45:00+05:30",
    "salary": 100.1
}'
```

**Expected Result:**

Response code is 400

**Actual Result:**
405 method not allowed is returned

**Screenshot**:



**ID:** 12

**Title:** 405 Method Not Allowed, DELETE /api/Employees/{id}

**Environment:** Prod

**Preconditions:**

-

**Steps to Reproduce:**
1. Send GET request via curl, where the id has incorrect format:

curl --location --request DELETE 'https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/Prod/api/employees/00000000-0000-0000-0000-000000000000' \

--header 'Authorization: Basic VGVzdFVzZXI4OTk6I3paWDtRfGlxRjh6'

**Expected Result:**

Response code is 400

**Actual Result:**
405 method not allowed is returned

**Screenshot**:

-

## UI bugs:

**ID:** 1

**Title:** Incorrect benefits cost value

**Environment:** Prod

**Preconditions:**

Log in to the ‘Paylocity Benefits Dashboard’

**Steps to Reproduce:**
1. Click on Add Employee

2. Add ‘TestName’ into First Name field

3. Add ‘TestLastName’ into Last name field

4. Add ‘10’ into Dependents field

5. Click on Add button

**Expected Result:**

The value inside Benefits Cost cell should be equal 6000

**Actual Result:**
The value inside Benefits Cost cell is 230.77

**Screenshot**:

**ID:** 2

**Title:** Add Employee with all empty fields

**Environment:** Prod

**Preconditions:**

Log in to the ‘Paylocity Benefits Dashboard’

**Steps to Reproduce:**

1. Click on Add Employee

2. Do not add any information into ‘First name’, ‘Last name’ and ‘Dependents’ field

3. Click on Add button

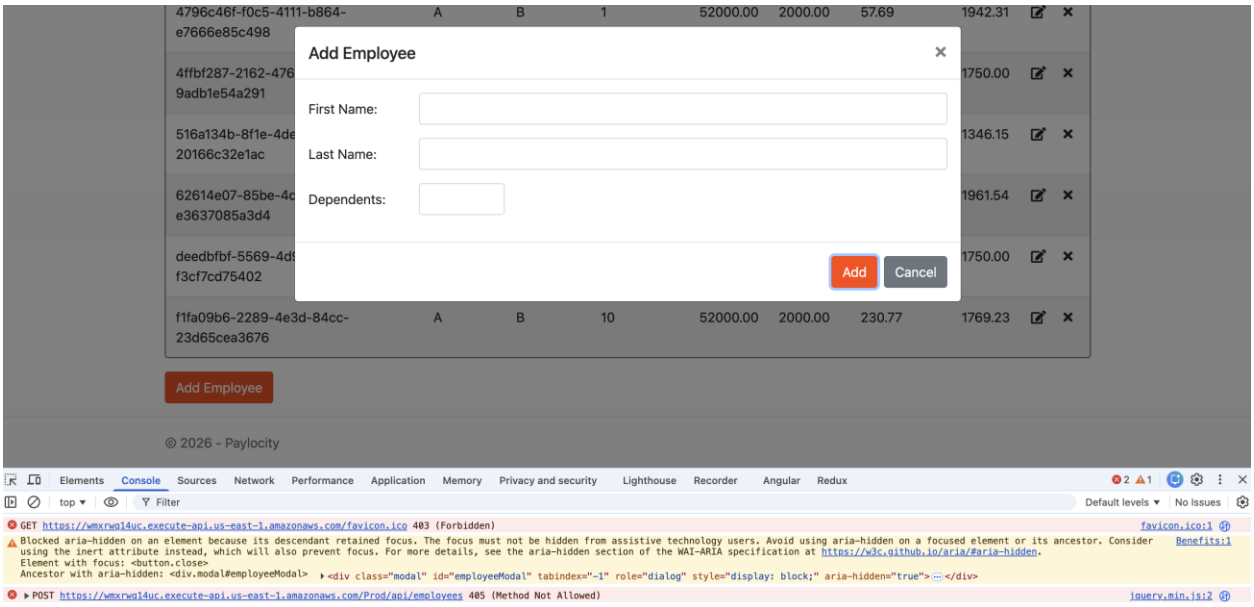
**Expected Result:**

There should appear an error / or modal window should disappear

**Actual Result:**

After clicking of Add button nothing happens on UI side, request failed with status code 405

**Screenshot**:



**ID:** 3

**Title:** No auto redirect to login page after token’s expiration

**Environment:** Prod

**Preconditions:**

Log in to the ‘Paylocity Benefits Dashboard’

**Steps to Reproduce:**

1. Wait for token expiration

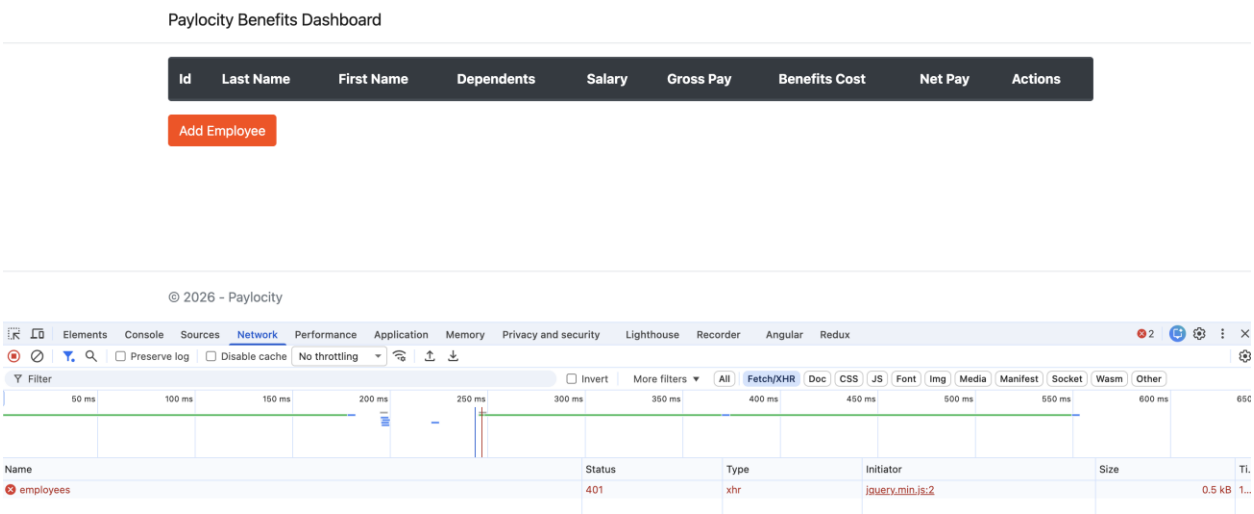
2. Refresh page

**Expected Result:**

The login page is open

**Actual Result:**
The page ‘Paylocity Benefits Dashboard’ still open with no link to login page

**Screenshot:**



**ID:** 4

**Title:** Forbidden 403 error inside console

**Environment:** Prod

**Preconditions:**

Log in to the ‘Paylocity Benefits Dashboard’

**Steps to Reproduce:**

1. Open console

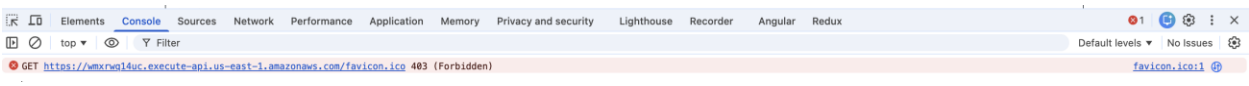
**Expected Result:**

No errors were printed inside console

**Actual Result:**

The error ‘favicon.ico:1 GET https://wmxrwq14uc.execute-api.us-east-1.amazonaws.com/favicon.ico 403 (Forbidden)’ appears

**Screenshot**



**ID:** 5

**Title:** Console warning ‘Blocked aria-hidden on an element’

**Environment:** Prod

**Preconditions:**

Log in to the ‘Paylocity Benefits Dashboard’

**Steps to Reproduce:**

1. Open console

2. Click on edit row button

3. Click on cancel button

**Expected Result:**

No warnings were printed inside console

**Actual Result:**

The warning ‘Blocked aria-hidden on an element because its descendant retained focus’ appears

**Screenshot**

**ID:** 6

**Title:** Update row with no new changes

**Environment:** Prod

**Preconditions:**

Log in to the ‘Paylocity Benefits Dashboard’

**Steps to Reproduce:**

1. Click on edit button for existed row

2. Do not change anything

3. Click on Update button

**Expected Result:**

The error appears / or Update button is disabled, no new PUT request is sent

**Actual Result:**

New PUT request is sent

**Screenshot**

**-**

**ID:** 7

**Title:** Last name and First name position in table

**Environment:** Prod

**Preconditions:**

Log in to the ‘Paylocity Benefits Dashboard’

**Steps to Reproduce:**

1. Click on add Employee button

2. Fill all the rows with correct data

3. Click on add button

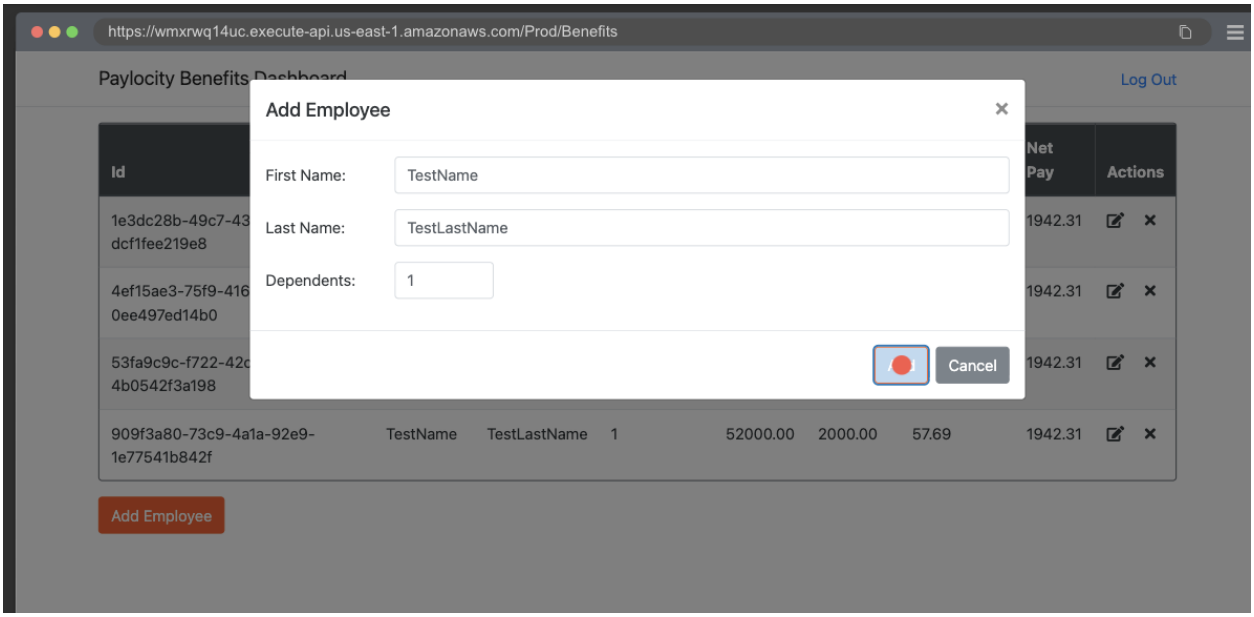
**Expected Result:**

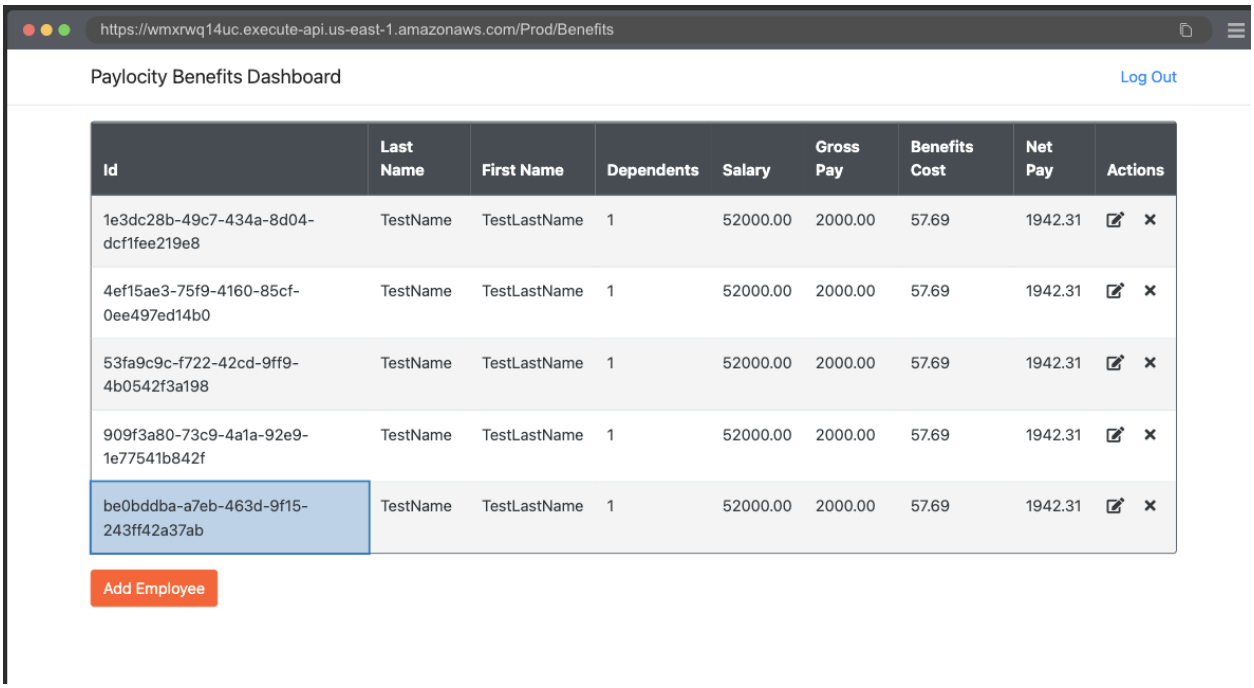
Last Name cell contains information about Last Name and First Name contains First Name details

**Actual Result:**

Last Name contains data about First Name and First Name has Last Name

**Screenshot**





## Summary:

During testing, 12 defects for APIs were found and 7 defects for UI.
